本郷キャンパス

Collisions occur frequently in front of busy gates!  
Multiple cases where cyclists cause pedestrians to fall and be injured at pedestrian crossings.

Caught the wheel and fell while getting onto the pavement from the road. Sprained left wrist.

Slipped and fell at a corner while on a bicycle. Bruised right ribs.

Slipped and fell on a rain-slick cobblestoned road surface. Bruised left knee.

While crossing at a pedestrian crossing, he was hit by a bicycle coming from the left. He resulted with pain in neck, shoulder, etc.

Bicycle bounced up on a rough road surface, hitting and cracking the tailbone with the saddle.

The rider lost his balance and fell over as the bicycle tire was low on air.

While avoiding a passenger car, going between a set of curbs while avoiding a car, lost balance and fell against a fence. Received 4 stitches to the left hand.

A bicycle coming down a ramp at high speed at night collided head-on with a pedestrian crossing the street. Cervical spine sprain.

While cycling using only one hand, could only brake with the front wheel so lost balance and fell. Contusion to the right side of the face.

Easy to gain speed because of the slope. Many accidents due to slipping on the wet road surface and fallen leaves.

A high number of crashes in front of the gates, especially where there are crowded crossings!

The bicycle wheel got caught in the joints of a cobblestone pavement, ending up being thrown over the handlebars. Fell head first, resulting in being bruised all over the body.

Tire got caught in a road cave-in and fell off the bicycle. Bruises and abrasions.

Fell on a gravel washout surface that was slippery after rain. Bruised head.

Fell while turning on a bicycle in an area covered by fallen leaves.

Slipped and fell when braking. Bruised hand and knee. Fractured the right thumb.

The road surface was frozen due to build up of snow. Slipped and fell while cycling. Injury to the left elbow.

Slipped and fell when turning a corner on a wet road surface.

Rode over a hump while cycling and fell, sustaining head injury.

Fell while trying to avoid an oncoming bicycle. Laceration above left eye.

People can pop out from any of the many corners!  
You can easily gain excess speed and lose control going downhill, and be careful when going through the hump.

Collided with a box car coming from the side while cycling down a street. Bruised right knee.

Bicycle wheel got stuck in the gutter resulting in a fall. Abrasions sustained to arms and legs.

The front wheel locked up due to braking error while going downhill resulting in a fall. Elbow fractured.

Be careful at this small gate and avoid colliding into unaware passersby!
