

Faculty position: Project Associate Professor

We, Graduate School of Agricultural and Life Sciences, the University of Tokyo are developing an agricultural program entitled, “culturing the ability to solve the problem in agriculture related to social situation”, which is an international education program based on the research. We intend to offer an academic staff position, Project Associate Professor for this project during the next four-years, at most, with the renewal of the position every year. The Project Associate Professor is expected to handle the publication of educational materials (publication of the text book, reference, movies, slides, etc.) related to the project studies including Fukushima issues. From the point of diversity of the staff, female and international applicants are strongly encouraged.
